### **Guidelines/Specifications for Lawn Irrigation Systems**

- Submit plot plan showing the location of sprinkler heads and backflow prevention device.
- A licensed tester must certify the backflow prevention device and an original certification test report must be attached to the backflow device at the time of inspection.
- Per Ordinance 2007, yard sprinkler systems shall be piped with Schedule 40 PVC for all pressure lines. Field lines not under pressure may be Class 160 PVC piping minimum.
- Items checked at final inspection: connection to City water supply and pressure vacuum break-insulated and supported. Must be PVB, not anti-siphon or check valve.
- The application is non-transferable, and work must be started within 180 days of permit issuance date or such permit will be null and void.
- This application must be accompanied by the required documents required by City Ordinance prior to starting construction.
- Work without a permit posted could result in additional fees, work performed without a permit contractor will be assessed a \$350.00 fine plus the cost of the permit.
- Re-inspection fees must be paid prior to re-inspection at a cost of \$60.00.
